Subject: Substance Abuse

Hello everyone. I would like to propose a meeting of the A Team to discuss development of a comprehensive program, to try to address substance abuse problems in the Aleutian Pribilof Region. I know we have two providers already in the region working on this. This is not an attempt in any way to step on their turf or take money away from existing programs. I also know the AEB is working on a resolution addressing this issue as well.

For many years I have been thinking about a comprehensive program, I have recently spoken with both Trident Seafoods and Peter Pan and both are very interested in participating, financially and otherwise. We all know this is a huge problem and it is getting worse. If we pool our resources we have the capability to stretch from the village level to training to job opportunities to treatment options to sober and safe living and working environments and back to the village again. I believe we can also generate additional funding from grants and other outside resources to help implement such a program.

We all know we need to do this. We are losing the battle right now.

Please share your thoughts, and extend this email string further if you wish. Thank you.
